Message from the Guest Editors

In the past three decades, a stream of criminological inquiry has emerged which explores, measures and theorizes crimes and harms to the environment at the micro-, mezzo-, and macro-levels. This “green criminology,” as it has come to be known, has widened the criminological gaze to consider crimes and harms committed against nonhuman animals, air, land and water in local, regional, national and international arenas. Accordingly, green criminology has endeavored to understand the causes, consequences and potential responses to air and water pollution, biodiversity loss, climate change, corporate environmental crime (e.g., illegal waste disposal), food production and distribution, resource extraction and exploitation and wildlife trade and trafficking. This *Special Issue* aims to introduce green criminological perspectives to audiences in the fields of anthropology, economics, environmental humanities, environmental sociology, geography, history and political ecology.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Social Sciences is an international open access peer-reviewed journal publishing the latest research across all disciplines of the social sciences including anthropology, criminology, economics, education, geography, history, law, linguistics, political science, psychology, social policy, social work, sociology and related areas. The journal is especially interested in interdisciplinary research, and aims to facilitate the interaction and communication between different social scientific disciplines. The journal welcomes conventional length articles as well as shorter Research Notes or short articles, as long as they meet the journal's standards of quality and originality.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.

Journal Rank: CiteScore - Q1 (*General/Social Sciences*)
