Message from the Guest Editor

This Special Issue welcomes contributions regarding novel automated testing approaches improving the state-of-the-art on testing modern software with a particular (but not limited) focus on Web, Mobile, IoT, ML/AI-based systems, and applications.

Topics of interest include but are not limited to the following:

- Testing of web applications;
- Testing of mobile applications (e.g., Android, iOS);
- Testing of Internet of Things systems;
- Testing of Machine Learning and Artificial Intelligence-based systems/applications
- Automated generation and maintenance of test cases for modern systems/applications;
- End-to-end testing of web and mobile applications;
- Acceptance and system testing of modern systems/applications;
- Machine Learning and Artificial Intelligence applied to software testing;
- Tools and frameworks for testing modern systems/applications;
- Empirical studies on modern systems/applications testing (e.g., experiments, surveys, literature reviews).
