Center, Atlas sp. z o.o., 2,
Kilinskiego St., 91-421 Lodz,
Poland

Deadline for manuscript
submissions:

closed (31 December 2022)

Message from the Guest Editor

Construction product assessment is a complex, challenging, and not always fully defined issue. It is perceived differently by different stakeholders of the construction product market, especially by industry, academia, and regulators. A Special Issue of *Standards* dedicated to evaluating construction products is important, and I invite everyone interested in assessing construction products to publish in this Special Issue of *Standards*.
