Message from the Guest Editors

Sophisticated soft computing techniques have the potential to solve complex problems in various applications, irrespective of the domain. The main objective of this Special Issue is to consolidate the most advanced soft computational approaches to solve cumbersome problems experienced in various applications that also lead to sustainable development in engineering and sciences.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
