Message from the Guest Editor

Dear Colleagues,

At the forefront of international modern macroeconomic objectives is the achievement of sustainable growth, characterized by factors such as clean energy, food security, the mitigation of climate change, and the elimination of poverty. There is abundant evidence of climate change, which is fuelled by the consumption of fossil fuels as a source of energy. To mitigate climate change, experts have advocated for clean energy derived from the sun, heat, wind, tides, waves, biomass, and bioresources, as well as the use alternative energy sources such as agricultural produce. Authors are invited to submit empirical, methodological, and theoretical research on links between the economy, energy, and agriculture. Perspectives from multiple disciplines are welcomed, including science and technology, the humanities, management, and the social sciences, as well as public and scientific studies.

I look forward to receiving your contributions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
