Message from the Guest Editors

Dear Colleagues,

With the development of modern information technology, intelligent construction has become an important approach for the delicacy management of hydraulic engineering projects. The continuous emergence of modern remote sensing and monitoring technologies, such as satellite remote sensing, aerial remote sensing, UAV tilt photography, intelligent sensors, and the Internet of Things, provides advanced sensing means for the dynamic online monitoring of river basins and hydraulic engineering projects, as well as a technical driving force for intelligent analysis and efficient decision making for their safe operation.

Safety risk management of hydraulic engineering;

Application of artificial intelligence method in hydraulic engineering risk management;

Sustainable risk of hydraulic engineering;

Risk management of hydraulic engineering based on remote sensing, intelligent sensors, Internet of Things, and digital twin.

Dr. Huimin Li

Dr. Jiyong Ding

Dr. Liangliang Song

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
