### Message from the Guest Editors

This Special Issue "Advancements in Catalyst Development for Sustainable Applications" strives to address global environmental challenges, economic growth and resource conservation. Catalysts play a crucial role in a wide range of industrial processes (over 90% are catalytic processes), therefore the development of catalysts with special performances specific for certain reactions that promote sustainable processes represents a global challenge for all researchers in the field. The purpose of this Special Issue is to present state-of-the-art strategies for improving the performance of catalysts regarding the modification of physicochemical and structural properties for custom-designed applications.

This Special Issue aims to collect original research articles and reviews focusing on the development of innovative catalytic procedures

Deadline for manuscript  
submissions:

**15 December 2024**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
