Message from the Guest Editors

This Special Issue aims to document the work conducted across the region on the integrated drought risk management. Further, the respective BMPs along with region-specific frameworks will also be considered for this Special Issue. This will be an opportunity to raise the voice of the land, as encouraged by the United Nations Convention to Combat Desertification (UNCCD) and promote practices that reduce and ultimately avoid land degradation and achieve a land degradation neutrality for the security of our food.
