31 October 2024

Message from the Guest Editors

Dear Colleagues,

Freshwater systems play a pivotal role in sustaining human life, serving as the lifeblood of agricultural production, industrial processes, urban development, and the diverse biota upon which our existence depends.

This Special Issue delves into the multifaceted dimensions of sustainable water management, emphasizing its role in addressing the increasing water demand on a global scale. This approach not only delineates the development and utilization of sustainable water resource management but also aims to equip water managers with actionable insights into ecosystem functioning.

This Special Issue aims to underline the need for a comprehensive assessment of freshwater systems and stress the importance of tailoring these assessments to meet the informational needs of diverse end-users. In doing so, we seek publications bridging the gap between scientific understanding and practical application, paving the way for informed decision making and the preservation of this invaluable resource for future generations.

Original research articles and reviews are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
