Institute of Technology  
Kharagpur, Kharagpur 721302,  
India

**Dr. Sagar Shirsath**

School of Materials Science and  
Engineering, The University of  
New South Wales, Kensington,  
Sydney, NSW 2052, Australia

Deadline for manuscript  
submissions:

**closed (29 February 2024)**

### Message from the Guest Editors

Growing energy demands, limited fossil fuel availability, and environmental concerns have promoted the study and development of new ecofriendly sustainable technologies that could provide humanity with a safe and sustainable future. Advanced materials with novel structures and new application directions have the greatest potential impact on the energy society. Bioinspired advanced materials can provide clean energy resources as well as a sustainable environment, which can play a crucial role in providing new strategies to accumulate different energies using different green resources. The current Special Issue is devoted to advanced-material-based energy harvesting and storage applications using different technologies, such as piezoelectric, triboelectric, solar, supercapacitors, etc., for sustainable society developments. The motivation of the present Special Issue is to explore future strategies in the abovementioned areas using bioinspired materials, which are of great interest to the scientific community, including academic researchers, environmentalists, materials scientists, and industrialists.

Applied Science, University of  
Ontario Institute of Technology,  
Oshawa, ON L1G 0C5, Canada

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
