Region, Spokane, WA, USA

Deadline for manuscript  
submissions:

**closed (30 September 2023)**

### Message from the Guest Editors

Dear Colleagues,

Clean and safe water is a basic asset for a flourishing society and thriving economy, with the sustainable management of wastewater having gained scientific attention due to treated wastewater now being considered a resource rather than a waste. This Special Issue could provide a suitable platform for publishing novel research on wastewater management practices and the development of hybrid and emerging technologies for the improvement of existing methods targeted toward the removal of these pollutants. This Special Issue aims to focus on, but not be limited to, the following potential topics of interest:

- Municipal/industrial wastewater treatment for sustainable development and environmental safety;
- Novel technologies for the removal of emerging pollutants;
- Wastewater treatment techniques, such as biological, chemical, thermal, and hybrid technologies;
- Wetland treatment systems;
- Hybrid bioreactor concepts;
- Nutrient recovery from wastewater;
- The fate and transport of contaminants;
- The modeling of wastewater and sludge management systems;
- Sludge treatment and disposal techniques.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
