Geotechnical Engineering,  
Pontificia Universidad Católica  
de Chile, Santiago, RM 7820436,  
Chile

Deadline for manuscript  
submissions:

**21 September 2024**

### Message from the Guest Editors

The seismic resilience of our urban environments can be described as the ability of our infrastructure to rapidly and efficiently cope with the impacts derived from seismic activity. Communities are currently demanding more than structural safety, where resilience should be oriented at minimizing environmental impacts, downtime and economic losses, but evaluated in life-cycle terms.

Consequently, in this Special Issue, we invite you to submit works that combine both sustainability as well as the seismic resilience of infrastructure, addressing topics such as: (i) the performance-based seismic design of new infrastructure, especially with the incorporation of life-cycle design goals (e.g., environmental impacts, downtime and economic losses); (ii) the performance-based seismic retrofit of existing infrastructure; (iii) the development/assessment of new materials/structural systems for improved seismic performance, evaluated in life-cycle terms. Some other possible topics are indicated in the keywords above, but please note that this list is not exhaustive.

We look forward to receiving your contributions.

Dr. Gerardo Araya-Letelier

Dr. Diego López-García

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
