Deadline for manuscript submissions:

4 June 2024

Message from the Guest Editors

Dear Colleagues,

A smart city, defined as an innovative urban development aiming for sustainable development and high quality of life of its citizens, has been increasingly linked to the concept of open innovation. Open innovation practices have augmented knowledge flow, accelerated innovation, and increased markets for the external benefit of the results of innovation. Consistent with the open innovation paradigm, smart cities are open in terms of the actors and the resources they involve, and they actively promote data sharing. Local governments play an essential role in the sustainability of innovation, not only in helping to advance business models facilitating collaboration among universities, industries, and society, but also in both helping to create knowledge and stimulate demand.

This Special Issue aims to promote the use of emerging technologies and innovation processes to foster open innovation in business models and public services for achieving sustainability and all issues concerning the interaction between smart cities and sustainable practices in the design and implementation of innovative public services.

We look forward to your contribution.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
