Message from the Guest Editors

In the last decade, hospital managers and healthcare practitioners have started paying ever more attention to logistics activities. In today's world, different logistics-based decisions in the supply chains of hospitals and homecare services have to be made. These decisions are related to the healthcare facility's location, the routing and scheduling of workers and patients, stock management, purchasing, and all the supply chain activities for the healthcare systems and other relevant systems. It is very difficult to simulate and model such practical systems with different real-life constraints. Moreover, the COVID-19 pandemic has imposed additional challenges for healthcare supply chain stakeholders that have to be accounted for when planning different supply chain operations for healthcare. Developing intelligence-based approaches, such as computer-aided techniques, could be very useful for managers and practitioners in this domain. Predictive methods, on the other hand, can assist relevant healthcare stakeholders who often deal with various sources of uncertainty in their operations.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
