### Message from the Guest Editors

In the 21st century, there is a rising awareness of the importance of safeguarding the environment and minimizing our impact on the planet. As a result, businesses are being pushed to embrace more sustainable practices in areas such as product design, management, and manufacturing. Companies worldwide increasingly recognize the significance of proactive policies and preventive measures for environmental conservation, encompassing both economic and ecological considerations.

This Special Issue is dedicated to exploring the innovative solutions that can help minimize the impact of humans on Earth. For this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

Product design strategies

New product development practices and tools

Management practices

Manufacturing practices and technologies

Digital technologies and approaches

Resource assessment and plan to minimize its use

Optimization and control of raw resources

Environmental effects of production

We look forward to receiving your contributions.
