Message from the Guest Editors

Dear Colleagues,

We invite you to publish in our Special Issue designated to cover recent studies related to Food Choice and Environmental Concerns and to promote your work, and research outcomes in nutrition, food behaviors, environmental sustainability, health, and food safety fields for tackling the burden of imbalanced diet consequences upon environment and health status, starting with the food choices we made. *Sustainability* covers environmental, social, and economic dimensions, and requires an interdisciplinary approach in order to explore and emphasize issues and advanced data in these areas. Papers selected for this Special Issue will be subject to a rigorous peer review procedure with the aim of rapid dissemination of research results, developments, and applications.

The Special Issue will also focus on nutrition behaviors and food safety.

Scope: to present to other researchers your new findings in this area.

Purpose of this issue: to tackle new data on food choices and behaviors in relationship with ethno-social-economic-environmental influences upon consumers and management aspects.
