**Dr. Mani Poshdar**

Building Engineering, Auckland University of Technology, Auckland 1010, New Zealand

Deadline for manuscript submissions:

**closed (31 December 2022)**

### Message from the Guest Editors

I am pleased to invite you to this SI, the aim of which is to trigger discussions and set the stage for revisiting the transformative role associated with sustainable construction engineering and management and implications for our built assets. This includes technology, process, and policy implications; barriers and drivers; and the innovations, outcomes, and risks involved in such a transformation. The aim is to provide a repository for relevant studies and lessons learned, and an opportunity to facilitate knowledge sharing and discussion among researchers, practitioners, and policy makers.

This SI targets up-to-date surveys, simulation, analysis, and synthesis approaches with a particular focus on sustainable design, planning, engineering, technology, management, and delivery of construction projects. Studies of theoretical, empirical, and experimental nature along with case studies on the description of real-life projects are welcome. Of particular interest are multidisciplinary research studies involving industry practitioners, built environment experts, and project managers that provide rigorous sustainable construction practices on real-life projects.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
