Deadline for manuscript submissions:

closed (31 December 2023)

Message from the Guest Editors

The intrinsic structure of biomass-derived carbon highly depends on the morphology and components of original substances, which also greatly affects its physicochemical, electronic, and magnetic properties. As a result, various biomass-derived carbon materials probably exhibit very different applied performance in some yields. This Special Issue aims to provide a platform to display the latest research results regarding the preparation and application of biomass-derived carbon materials. This Special Issue will focus on multidimensional topics about the BDC, such as the structural conversion process, structural characterizations, application exploration, and scale-up production.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Structural monitoring from biomass to carbon
- Product analysis during the conversion process
- Thermodynamic and energy management
- Application of BDC for energy storage and conversion
- Application of BDC for environmental modification
- Design and application of BDC-hybridized carbon materials
- Design and application of functional BDC-based composites

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
