Message from the Guest Editor

Dear Colleagues,

The increasing uncertainty concerning the future of climate and social behavior has created global concern and doubt as to whether water resource management is being carried out in a sustainable way. It is essential to manage water resources sustainably, to reconcile the interests of water users, and to protect and not deteriorate the state of the natural environment, for which monitoring is essential as a complement to this management.

For this Special Issue, studies on the latest knowledge in the field of sustainable water management will be especially welcome, with the aim of covering different methodologies in order to test different scenarios. Therefore, this Special Issue welcomes contributions such as original research articles, technical articles, or reviews, which may be related to water management in urban areas, agriculture, industry, water-use efficiency, etc.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
