Optimization and Evaluation of Climate Responsive Design Solutions for Buildings and Cities

Guest Editors:

Dr. Jacopo Gaspari  
Associate Professor, Department of Architecture, University of Bologna, 40136 Bologna, Italy  
jacopo.gaspari@unibo.it

Dr. Rosa Schiano-Phan  
School of Architecture and Cities, University of Westminster, London W1B, UK  
r.schianophan@westminster.ac.uk

Dr. Laura Aelenei  
Laboratório Nacional de Energia e Geologia | LNEG, Estr. da Portela 999, Amadora, Portugal  
laura.aelenei@lneg.pt

Deadline for manuscript submissions:  
15 June 2023

Message from the Guest Editors

The ever-increasing evidence of climate change impact on the built environment and the recent IPCC projections call for effective and innovative design approaches to concretely tackle the most urgent challenges and particularly those dealing with the use of water and resources while supporting the energy transition in time of unprecedented uncertainty. The launch of the EU Recovery Plan represents an urgent claim for a global reaction and for more comprehensive solutions able to consider the complexity of strongly interrelated phenomena.

Climate Responsive Design represents the combination of several approaches and strategies to make buildings and cities able to respond to contemporary challenges optimizing their systems, configuration and operation according to variable and sometimes extreme context conditions.

This Special Issue of Sustainability is aimed at collecting scientific contributions on climate responsive solutions focusing on adaptive capacity, energy efficiency and environmental quality carefully considering technical, social, economic implications.
I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

**Author Benefits**

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 *(Environmental Sciences)* / CiteScore - Q1 *(Geography, Planning and Development)*
