### Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to tackle the environmental problem connected to high levels of particulates from nano to micro-scale and to improve the understanding of levels, nature and possible adverse effects after exposure in indoor workplaces and urban areas, considering the integration of human biomonitoring studies with measured data.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Data collection, presentation and analysis in urban areas and workplaces
- Development of new technical solutions for monitoring PM and UFPs.
- Air quality modelling
- Analysis and assessment of pollution due to PM from micro to nano scale
- Source contribution
- Adverse health effects
- Exposure and Biomonitoring studies
- Measures and policies for the reduction of particulate pollution

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
