Message from the Guest Editors

Our pathway:

Maximizing the value of fisheries' products represents a way (though hopefully not the only one) to compensate for the above stringent management measures and avoid an irreversible fishing crisis.

Based on this, the present Special Issue seeks to bring together innovative research results, advancements, and novel seafood packaging–labelling techniques directed towards improvement in the quality, shelf-life, certification, traceability, and security of fishery products.

It is believed that investing in the development of new seafood products that can satisfy a new generation of consumers who require ready-to-cook and/or time-saving products can contribute to opening new markets, to building more trust among fishery stakeholders, and (last but not least) achieving a sustainable use of marine resources.

an Open Access Journal by MDPI

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
