Deadline for manuscript submissions:

9 July 2024

Message from the Guest Editors

Dear Colleagues,

We invite contributions that address the benefits and challenges of Sustainability of Biodiversity and Ecological Conservation in Forests in managed and unmanaged forests.

Monitoring biodiversity in European forests through the study of ecological indicators is necessary to support and strengthen ecologically sustainable management. Accurate and timely information on forest biodiversity is necessary to assess the conservation status of forest ecosystems and to support management at the stand and landscape level.

Furthermore, microhabitats have recently attracted the attention of scientists as indicators for monitoring forest biodiversity, with a complementary role compared to common indicators such as deadwood and large trees.

Considering that the use of biodiversity indicators in forest monitoring has increased in recent decades as a tool to support forest management, this upcoming Special Issue on “Biodiversity Indicators for Ecological and Sustainable Conservation in Forests” seeks original research papers on the conservation status of forest biodiversity at the stand and landscape level.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
