# **Plant Diversity and Conservation in the Mediterranean**

Guest Editors:

### Dr. Kostas Kougioumoutzis

Department of Ecology and Systematics, Faculty of Biology, National and Kapodistrian University of Athens, 15701 Athens, Greece

### **Prof. Panayiotis Trigas**

Laboratory of Systematic Botany, Department of Crop Science, Agricultural University of Athens, 11855 Athens. Greece

Deadline for manuscript submissions:

closed (1 June 2022)

## **Message from the Guest Editors**

More than 400,000 plant taxa are currently known to science, with nearly 2,000 taxa being described each year. This remarkable plant diversity, which is unevenly distributed on the planet, is facing unprecedented levels of threat due to human actions. The Mediterranean, apart from being the second largest global biodiversity hotspot. is also a global biodiversity hotspot of vulnerable taxa and is among the regions where the effects of climate and landuse change on plant diversity are expected to be the largest. There is thus an urgent need to assess current biodiversity patterns, conservation actions, practices and management plans, as well as for studies conducted on potentially threatened or socio-economically important taxa. This Special Issue aims to encourage on-going plant diversity and conservation research in the Mediterranean at any level (from molecular to ecosystem).

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

## **Message from the Editor-in-Chief**

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
