Message from the Guest Editors

This special issue focuses on attaining eco-efficiency of urban systems either in pavements designing, or in construction management, or in emissions/pollutions assessment/management. The issue emphasizes on optimization criteria that enhances the sustainability of urban health.

Keywords

- Pavement design
- Flexible and rigid pavement
- Concrete Block pavements
- Permeable pavements
- Sustainable construction material
- Urban health
- Emissions (risks assessment/management)
- Energy efficiency
- Environmental efficiency
- Water management
- Urban heat effects

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
