Integrated Pest Management and Risk Assessment of Biopesticides

Guest Editor:

Dr. Belen Guijarro

Department of Plant Protection, Instituto Nacional de Investigación y Tecnología Agraria y Alimentaria (INIA), Madrid, Spain

Deadline for manuscript submissions:

16 September 2024

Message from the Guest Editor

Synthetic pesticides constitute an integral part of modern agriculture. Regardless, there are growing concerns about their frequent detection in natural resources.

The development of alternative active substances for the control of crop pests and their implementation in Integrated Pest Management strategies have been encouraged to address these concerns. Biological pest control agents can contribute to the development of new integrate pest control strategies, as they generally pose little health or environment risk and can have good compatibility with many beneficial invertebrates used in integrated pest control methods.

Ecosystems are important for regulating pests and vectorborne diseases that attack plants. There is need to assess the ecosystem impacts associated with the release of any of these low-risk biopesticides and develop specific methods of determining their possible non-target effects. Adequate monitoring and the use of molecular techniques to identify and follow the movement of biological products are needed to examine and mitigate the potential negative biological impacts.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
