Message from the Guest Editors

Multimodal transportation provides an efficient, flexible, economic, and resilient platform for both freight and passenger transportation. It could support sustainability by making efficient use of resources, improving transport structure, and enabling environmentally friendly transport choices. With the continuous growth of transport/travel demands and the need for sustainable development, multimodal transportation has attracted increasing attention from academic, industrial, and political communities. Tremendous research has been dedicated to establish, manage, and optimize the multimodal transportation system in the past few decades with rich outcomes in both theory and practices.

The purposes of this Special Issue are to publish state-of-the-art research on technologies, operations management, policies, and applications for sustainable multimodal transportation. Topics include (but are not limited to) the following:

- Data analytics for multimodal transportation
- Network analysis, design, and optimization
- Policies and practices for sustainable multimodal transportation
- Risk analysis of multimodal transportation system

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
