Message from the Guest Editors

The focus of this Special Issue is to discuss how to increase supply chain sustainability in an analytical way via adequate innovations and appropriate risk management. The scope of this issue includes any scientific research investigating the economic, social, and environmental sustainability of all stakeholders in the supply chain industry, including but not limited to information providers, transportation, warehousing, retailing, and distribution operators. The purpose of this issue is to provide a universal platform to encourage logistics researchers and practitioners to contribute their logistics sustainability knowledge by demonstrating their insightful and empirical logistics research findings.
