Message from the Guest Editors

Renewable energy is regarded as an efficient tool to fight climate change. It has gained more prominence, especially after the Paris Agreement. Most countries made pledges to increase the renewable energy share and claimed to decrease the greenhouse gas emissions that originated from the energy sector. This Special Issue, “Renewable Energy and Environment”, aims to contribute the pledges stated in the Paris Agreement through advanced scientific and multi-disciplinary knowledge and studies, which will also act as a repository for the academic community, policy decision-makers, industrial practitioners, and the private sector.

We, therefore, invite papers on original studies, reviews, case studies, analytical analyses, and assessments, from different disciplines. These include renewable energy systems, energy efficiency and modelling in renewable energy systems, hybrid energy storage systems, renewable energy modelling, energy security, risk analysis, climate change impacts, life cycle analysis, environmental pollution, impact assessment analysis, financial and economic analysis of renewable energy systems, and renewable energy policy.

an Open Access Journal by MDPI

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
