

## **Sustainable Groundwater Management—the Role of Hydrogeology, Remediation, Risk Assessment, and Climate Change**

Guest Editors:

**Prof. Dr. Hwa-Lung Yu**

**Dr. Shao-Yiu Hsu**

**Dr. Jui-Pin Tsai**

**Dr. Yojin Shiau**

Deadline for manuscript  
submissions:

**closed (31 December 2022)**

### **Message from the Guest Editors**

Sustainable groundwater use and development becomes critical in dealing with extremely climate events and pursuing United Nations Sustainable Development Goals. Groundwater resources serve as a vital source for regional water supply under the climate change condition. However, improper use of the available groundwater resources leads to serious environmental disasters such as land subsidence or seawater intrusion. A groundwater management to secure ecologically and environmental sound groundwater resources for next generations requires technologies and strategies in many aspects including hydrogeology, monitoring, pollution prevention, remediation, risk assessment, governance, and political inputs.

In this Special Issue, we invite articles that focus on ( but not limit to ) the following topics:

- (1) groundwater and hydrogeology
- (2) groundwater resource assessment and management
- (3) groundwater pollution, remediation, and risk assessment
- (3) cutting-edge technologies for hydrogeological survey
- (4) groundwater resource for climate change adaption and Sustainable Development Goals

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
