submissions:

closed (10 February 2024)

Message from the Guest Editors

The main aim of this Special Issue is to contribute to the knowledge about the environmental impact of 3D printing techniques. Research areas may include (but are not limited to) the following: 3D printing of cementitious materials (concrete, mortars), 3D printing of geopolymers, 3D printing of soft and biomaterials, additive manufacturing for electronics and metamaterials, new materials for 3D printing (metals, composites, hard materials, ceramics, etc.), multi-material 3D printing, 3D printing technologies, metallization for 3D printing, 3D printing for microfabrication, numerical and finite element modeling of additive manufacturing processes, life-cycle assessment of additive manufacturing process, the environmental impact of the manufacturing process, and the economic aspects of 3D printing.

The present Special Issue welcomes research papers and review papers that apply 3D printing technology to improve sustainability and reduce environmental impacts. The papers published in this Special Issue will contribute to the knowledge about Sustainable Research on 3D Printing Technology.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
