Deadline for manuscript  
submissions:

**closed (21 May 2024)**

### **Message from the Guest Editor**

The role of Green Infrastructure in Landscape Capital and Urban capital can be influenced by different values and the importance that humans give to biodiversity at a certain time based on human needs, the manner that they use the goods and services, human awareness of benefits and their accessibility. This Special Issue aims to promote of the concept of ecosystem services in ecological planning passing from the concept of "ecosystems in landscape and urban systems" to "landscape and urban systems as ecosystems", and implying a concept leap from "ecology in socio-ecological capital" to the "ecology of socio-ecological capital".

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing your understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
