Message from the Guest Editors

Eco-environmental problems such as environmental pollution, ecological destruction, global climate warming, etc., require an economic transition and green development, so as to achieve the sustainable development of human society and the ecological environment. The outbreak of the COVID-19 virus in 2020 and the increasingly complex international geographical environment have accelerated the pace of the economic transition and green development.

This Special Issue targets the urgent needs of economic transition and green development, focusing on characteristic economic development modes, the clean and efficient utilization of resources, low-carbon development, regional development risks and countermeasures, green human settlements, etc., and aims to provide scientific supports for global and national green and low-carbon sustainable development.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
