Message from the Guest Editors

Human activities are impacting the global environment through land-systems change, climate change, freshwater use, biodiversity loss, and the alteration of phosphorous and nitrogen cycles, among others. Furthermore, they call for developing comprehensive methods that allow for assessing synergies and trade-offs between multiple impacts to facilitate decision making and policy formulation. In this vein, the environmental footprint family provides a number of indicators that together can reveal the true extent of impacts from human activities across environmental and ecological domains. These indicators, however, are rarely used together or combined, compared, or included in a common framework.

This Special Issue aims at investigating methods for integrating environmental footprint family indicators for assessing multiple environmental impacts and relative solutions. We solicit both original research and review studies focused on applications and methodological advancements of footprint indicators.

Special Issue

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
