# Food Waste: Treatments, Environmental Impacts, Current and Potential Uses

Guest Editor:

### Dr. Vita Di Stefano

Department of Biological, Chemical and Pharmaceutical Sciences and Technologies (STEBICEF), University of Palermo, 90123 Palermo, Italy

Deadline for manuscript submissions: closed (30 March 2023)

Dear Colleagues,

The use of byproducts is increasingly gaining attention, as they offer a significant and sustainable source of high-value biocompounds suitable for biotechnological or pharmaceutical applications and with high market value. The main topics of interest for this Special Issue include, but are not limited to, the following:

- classification and cataloging/categorization of main food waste and byproducts derived from vegetable and animal origin matrices;
- nutritional characterization and bioactive compound profile evaluation of food waste and byproducts;
- in vitro and in vivo studies on evaluation of biological properties from extracts/active components from food waste and byproducts;
- conventional and modern extraction and analytical procedures;
- uses and applications in several fields, i.e., nutraceutical, pharmaceutical, and cosmetic sectors;
- ongoing and future research trends and needs.

This Special Issue will provide an overview of the extraordinary potential of agrofood byproducts, listing the possible applications found so far for the most interesting compounds.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
