Dear Colleagues,

In the last decade, emerging technologies, such as Cloud Computing, Big Data Analytics, the Internet of Things, Blockchain, and Artificial Intelligence, have dramatically updated the traditional information management landscape. However, very few studies have explored the implication of organizational IS initiatives in the context of the latest technological innovation and development from the sustainability perspective and how they can help organizations go green, such as to facilitate green innovation and undertake environmental and social responsibility. Against this backdrop, this Special Issue aims to understand the adoption, development, implementation, and impact of IS initiatives in the sustainable development of organizations to fulfill the mission of sustainability in a broader context.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
