### Message from the Guest Editors

Dear Colleagues,

This Special Issue calls for papers addressing approaches, theories, case studies and strategies on process innovation for building energy renovations. It seeks for the root problems that cause the low renovation rate from the perspectives of policy makers, market stakeholders, professionals, occupants, etc. It addresses the multifaceted phenomena with a deep understanding of the institution and process (barriers and transaction costs), people (cognition and behaviour) and resources (information, incentives and intervention) combined.
