### Message from the Guest Editors

Dear Colleagues,

The application of remote sensing in natural resource management, landscapes and environmental monitoring is very crucial, which helped to improve governmental policies in the favor of science and society.

Across the globe, there are rich geographical, environmental and biodiversity variances with many prospects and challenges. It is notable that even with small changes in some regions of the earth, the consequences are not only limited to particular areas but also affected by the surrounding areas. Global change has highly impacted nature and society, and the impacts of such changes have widely drawn the attention of many scientists to carry out research work to understand the processes of change, its implications and mitigation measures and adaptation to the changes.

Thus, this Special Issue aims to collect scientific research and review papers on the application of remote sensing in landscapes and environmental monitoring in different regions and topography of the globe. We invite authors to submit both scientific research and review papers on this Special Issue.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
