Dear Colleagues,

Coal-based energy is a reasonable indicator of economic health in some developed economies, such as the USA, Canada, Australia, etc., and especially in developing countries, such as China, India, etc. Sustainable developments of coal mining technologies, coal mining damage control, environment protection and energy humanities are still interesting topics playing a key role in energy safety and climate change, especially intelligent and green mining technologies, the protection and utilization of mine water resources, restoration of the ecological environment in mining area, reuse of abandoned mines, coal mine solid waste backfilling, greenhouse gas emission control, etc. For these reasons, we propose a wide-ranging topic that can be summarized as “Sustainable Development of Mining Technologies, Damage Control, Environment Protection and Energy Humanities for Coal-based Energy”. This highly interdisciplinary theme can, therefore, involve a wide scientific audience, from geologists to mining, environmental and management engineers, as well as economists and educationists.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
