Message from the Guest Editors

Dear Colleagues,

Sustainable Project Management is the planning, monitoring and controlling of project delivery and support processes, with consideration of the environmental, economical and social aspects of the life-cycle of the project.

In a world of global digital transition the achievement of the sustainable objectives in business activities for 2030 is one of the key elements of project evaluation. It determines the go/no go for subsidization and the go/no go for delivering certain products to the market. The digital transformation will put project managers ahead of new problems, but also new methods and new techniques to scope them.

Project Managers must also be aware of this new reality and start to adopt measures from the very beginning of the life cycle process project management and take decisions consciously, considering all relevant aspects in the best managing practices.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
