Deadline for manuscript
submissions:

closed (15 May 2023)

Message from the Guest Editors

In order to promote the sustainable development of marine space, energy and resources, this Special Issue focuses on the geotechnical problems in marine technology development. Any issues related to this field can be submitted to and published in this Special Issue.

Authors are invited to submit their original research articles, case studies and review articles that concern any of the following subjects:

- Supported foundations for offshore wind turbines.
- The geotechnical engineering of islands and reefs.
- The foundations of anchoring systems.
- Mooring lines.
- Marine geological hazards.
- Marine pipeline engineering.
- Coastal engineering concerning hydrodynamics and related geotechnical problems.
- Shallow gas disasters in offshore areas.
- Geological CO₂ storage.
- The occurrence, migration and dissolution of marine pollutants.
- Geotechnical engineering problems such as the construction, operation and recycling of marine pasture.

Note that this list is not exclusive. Authors can submit articles that address subjects other than those mentioned but are related to the theme of sustainable material.

an Open Access Journal by MDPI

Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
