Message from the Guest Editors

Risk management affects the sustainability of projects in the long-term. A better insight into the project risk during the planning stage ensures that projects meet their strategic goals. With the business focus shifting from short- and medium-term where projects were treated as ends, to long-term where projects are treated as means to achieving sustainability goals, the research community needs to reciprocate by examining the role of risk management as a facilitator of sustainability.

With a substantial body of knowledge on risk management, projects still struggle to meet their short- and medium-term as well as long-term goals. This calls for research that integrates the effect of risk on sustainability. Thus, we invite you to submit papers to this Special Issue on integrated research on risk and sustainability.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
