Message from the Guest Editor

Dear Colleagues,

Today, there is an increasing concern for the environment, especially regarding the already evident rise in the planet's temperature. This circumstance has led to technological progress in the use of natural resources for energy and their availability to all productive sectors.

Faced with the current situation, it is vital to propose actions to put aside production models based on fossil fuels and opt for more sustainable models based on the circular economy, energy saving, and renewable energy.

Energy saving and renewable energy allow us to save our scarce economic resources, postpones the depletion of our scarce fossil resources (on which our energy supply depends for the most part), and finally seems to be one of the best alternatives for reducing CO₂ emissions...

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
