Message from the Guest Editor

This Special Issue aims to accommodate research on socio-economic functions across sustainable farmland systems, with a focus on, but not restricted to, practices, policies, and planning for environmental conservation in agriculture, climate-smart agriculture, conventional and biotechnological agriculture which not only mitigate and/or adapt to the challenges of climate change, natural disasters, food insecurity, and conflict but also boost nature-positive production, stabilizes production, and improve the welfare of the producers; processing and marketing of farm produce which ensure the livelihood of the producers, processors, and consumers, and access to safe and nutritious food; integration of nonfarming with farming activities; and building of a society resilient to all kinds of crises and hazards/conflicts.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
