Dr. Péter Bagi

Department of Organic Chemistry and Technology, Budapest University of Technology and Economics, Szent Gellért tér 4, H-1111 Budapest, Hungary

Deadline for manuscript submissions: **15 May 2024**

Message from the Guest Editors

Dear Colleagues,

This Special Issue is devoted advances in the chemistry of optically active compounds containing non-common heteroatoms, like S. P. Si, and B. The asymmetric center(s) may be in the heteroatom itself or in other parts of the molecular structure. The Special Issue welcomes regular research papers, reviews, and short communications in this field. Relevant topics include asymmetric hetereoatomcontacting organic and organometallic syntheses, and optical resolutions. Synthetic strategies and methodologies, applications of chiral auxiliaries or catalysts, transition metal complexes of P-ligands, the application of homogeneous catalysis, methods for the separation of enantiomers, theoretical or spectroscopic aspects, as well as physicochemical or biological activities of stereoisomers may be discussed in this scientific paper.

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Multidisciplinary Sciences*) / CiteScore - Q1 (*General Mathematics*); Q1 (*Physics and Astronomy*); Q1 (*Computer Science*)
