### Message from the Guest Editor

This Special Issue of *Symmetry* is dedicated to Professor Jacobus Henricus van 't Hoff (born August 30, 1852, Rotterdam, The Netherlands), who won the First Nobel Prize for Chemistry in 1901.

This Special Issue will consist of communications, original research articles, and review articles related to theoretical chemistry, physical chemistry, and stereochemistry, as well as anecdotes on Jacobus Henricus van 't Hoff.

## Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.
