Theories and Applications for Dynamical Systems, Symmetry Problems and Differential Equations

Guest Editors:

Prof. Dr. Renhai Wang

School of Mathematical Sciences,
Guizhou Normal University,
Guiyang 550001, China

Dr. Pengyu Chen

Department of Mathematics,
Northwest Normal University,
Lanzhou 730070, China

Deadline for manuscript
submissions:

closed (31 May 2023)

Message from the Guest Editors

Dear Colleagues,

Papers on any subjects related to symmetry problems, such as global attractors, pullback attractors, random attractors, invariant measures, large deviations, invariant manifolds, fractional calculus, traveling wave, lattice systems, and other topics related to dynamical systems and differential equations are welcome in this Special Issue.

Dr. Renhai Wang

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Multidisciplinary Sciences*) / CiteScore - Q1 (*General Mathematics*); Q1 (*Physics and Astronomy*); Q1 (*Computer Science*)
