Technology and Economics, 1521  
Budapest, Hungary

Deadline for manuscript  
submissions:

**closed (31 January 2024)**

### Message from the Guest Editor

“Chemistry and Symmetry/Asymmetry: Feature Papers 2023” is a Special Issue encompassing a broad range of topics in symmetry or asymmetry in chemistry. All kinds of symmetry-related problems in chemistry may be the subject of papers submitted to *Symmetry*. One of the most relevant fields includes optical activity that is the consequence of a kind of chirality center. New transition metal complex catalysts comprising optically active ligands, and the asymmetric reactions that they allow, are also of interest. Thus, all researchers are invited to contribute submissions focused on, but not limited to, the following necessary and emergent research topics in related areas: asymmetric syntheses; chiral catalysts and chiral P-ligands; X-ray structures; crystal structures; dynamic kinetic resolution; biocatalysts; molecular clusters; theoretical calculations on enantioselective reactions; quantum chemistry; coordination chemistry; and transition metal complexes.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Multidisciplinary Sciences*) / CiteScore - Q1 (*General Mathematics*); Q1 (*Physics and Astronomy*); Q1 (*Computer Science*)
