Deadline for manuscript
submissions:

31 May 2024

Message from the Guest Editor

Dear Colleagues,

Recent literature reviews have pointed out the intersection of Cybersecurity, Artificial Intelligence (AI), and Internet of Things (IoT) as the new “nexus” of our digital experience. The same way “web browsers” and “smart phones” have been our main interfaces, AI coupled with IoT, or AIoT, will soon become our new locus. This Special Issue will showcase contributions that address this intersection; we welcome articles throughout the spectrum of academic research: literature reviews, conceptual frameworks, methodological notes, empirical research, standards development, and implementation reviews. Cross-sectors and sector-specific studies (e.g., energy, healthcare, cities, etc.) are welcomed. Nevertheless, conclusions should attempt to generalize to various or all sectors, addressing at least one or two major gaps identified by recent reviews.

Chair, Department of Systems
and Information Engineering,
University of Virginia,
Charlottesville, VA 22904, USA

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

Journal Rank: JCR - Q2 (*Social Sciences, Interdisciplinary*) / CiteScore - Q2 (*Modeling and Simulation*)
