Message from the Guest Editors

The current body of knowledge, despite its extensive nature, is still insufficient to explain the etiology of certain metabolic diseases. This is because it is not a simple task to observe the changing chemical elements content, distribution, absorption, and interrelations between the vital toxic elements in the human body. Moreover, factors including diet, stress, lifestyle, and genetic predisposition may all interfere with the body's ability to maintain homeostasis and prevent disease.

This Special Issue aims to present research papers as well as critical reviews that address issues focusing on understanding the role that drug-mediated toxicity and potentially toxic chemical components play in the development of metabolic diseases. It is envisaged that this would shed more light on the numerous functions that toxicological components have in humans and could support the development of therapeutic strategies, ultimately helping us to better understand the human body's sensitivity to metabolic diseases.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Toxicology*) / CiteScore - Q2 (*Chemical Health and Safety*)
